

HDMI™

HIGH-DEFINITION MULTIMEDIA INTERFACE

High Definition Multimedia Interface

HDMI is the industry first, pure all-digital audio and video signal transfer for true all-digital crystal clear images. Audio and video signals are carried in a single cable direct from the source as they were meant to be seen and heard.

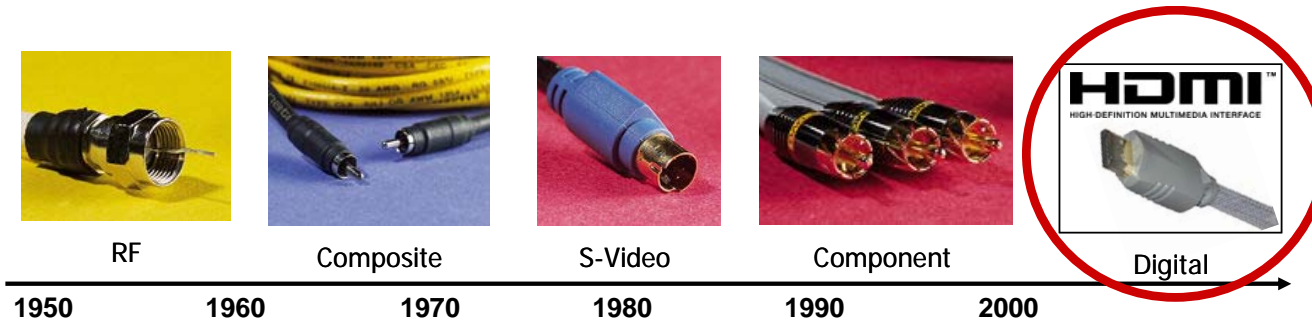

All Digital. Single Cable.

100% Digital

- No Compression, no conversion
- Pure digital picture and sound direct from the source

Only one cable required

- All your HD video and audio in one cable
- Replace up to 8 audio and 5 video cables

Customer Benefits of HDMI

100% Digital

- Pure digital picture and sound direct from the source
- Video and Audio signal remains digital from output device to display device
- Best quality sound and picture
- Bandwidth to spare for HDTV
- 1080p capable and beyond
- Over two times 1080i bandwidth

Only one cable required

- All HD video and audio in one cable, replaces up to 8 audio and 5 video cables
- Reduced Wiring Complexity

Automatic Format Intelligence*

- TV & AV Receivers can adjust without consumer intervention
- Video source receives the display's supported video formats, and outputs the optimal audio & video format
- Display regularly receives video format & aspect ratio from sources

Consumer Electronics Control*

- Entire home theater controlled from a single remote
- Enables high-level functions such as "one-touch play"

* These features are contingent on manufacturer implementation.
